

MODEL 14 SM

SPECIFICATIONS

- 5 PERSON LOUNGER SPA
- 80" L X 74" W X 30" D
- 1.5 BHP PUMP
- 20 STAINLESS STEEL JETS
- INTEGRATED HEADRESTS
- 110 VOLT/15AMP PLUG & PLAY SYSTEM
- 1 KW HEATER

ALL SPAS COME WITH:

- PATENTED DURA BOND™ ACRYLIC SHELL
- WEATHER GUARD™ MAINTENANCE FREE CABINET
- ELECTRONIC SOFT TOUCH TOPSIDE CONTROL
- PURE WATER MANAGEMENT SYSTEM
- OZONE SYSTEM
- ENERGY SAVER SYSTEM
- LED LIGHTING
- HARD COVER

SPA FEATURES

PATENTED DURA-BOND™

This four layer, patented strengthening process combines the beauty of Plaskolite Acrylic with a layer of ABS for shell strength and integrity. Then a double strengthening material is applied. This high density material has all the strengthening properties of fiberglass without the environmental concerns.

SHELL STRENGTHENING SYSTEM

1. Acrylic Shell
2. ABS
3. Dura-Bond™
4. Maintenance Free Cabinet
5. Polystyrene Insulation
6. Radiant Foil Insulation
7. Thermal Air Barrier
8. Moisture-Resistant Polyethylene Flooring

OZONE SYSTEM

Ozone is a safe, convenient, low cost way to clean your spa water. It is a natural purifier that aids in eliminating bacteria, viruses, mold & mildew. It helps remove minerals while using fewer sanitizing water care products. All USA Spas come equipped with the Ozone System Natural Water Sanitizing System.

ENERGY SAVER SYSTEM™

Heat is generated by the spa's power equipment inside the cabinet. This heated air is captured and returned to the spa's water. This continually helps maintain the water temperature without running the heater as often. The heat recovery system saves you money by reducing electrical cost.

MAINTENANCE-FREE WEATHER GUARD™ CABINET

Our Weather Guard™ cabinet is constructed of strong and durable polystyrene that won't crack, splinter or peel. This material is similar to high-end vinyl windows for your home. And since it replaces the wood of most spa cabinets, Weather Guard™ is termite, moisture, and rot resistant and 214% more rigid than wood. Weather Guard™ is energy efficient too - 62% more than traditional wood!

JET STYLES

Designed and built exclusively for USA Spas, jets are positioned for optimum performance. Settings range from power surge, which creates a lively swirling action to a high-power flow narrow which delivers a narrow stream for more intense therapy targeting specific areas of your body.

PURE WATER MANAGEMENT SYSTEM

The Pure Water Management System works automatically. It's like the cruise control on your car, set it and forget. Purge cycles automatically come on and moves the water through all of the plumbing. This moves potential stagnant water through the filter. The pump pulls surface contaminants like body oils, perspiration, dead skin, and hair into the vortex skimmer and allows the filter to trap it. The vortex skimmer skims the debris like a tornado encouraging 100% use of the filter.

SOFT TOUCH™ CONTROLS

State-of-the-art digital electronic control with LCD temperature and filtration readout. All functions are located at your fingertips.
